

Department of Mathematics

1. Title: - Helping Hands to Students

2. Objective of practice: -

To render monetary help to the needy among the students and also outside. To inculcate service motto in the students. To orient the munificent staff members and others to help the needy.

3. The context: -

There are many people who need money for dire needs caused accidentally. Some people suffer poverty and survive only through help. We need not be rich to help the needy. All we need is helping nature. Students need to learn this for better living.

4. Evidence of success: -

Staff members are also coming forward to work in the same line and money was collected and distributed to the individuals and orphanages.

5. Problems Encountered and Resources required: -

There's always a lot to do and money is always needed.

EVIDENCES
